Risk management proof

Native table with preserved narrative

2026-09-17 · Prepared by Consultify · DBR77

INTERNAL

Risks and mitigations

Risk exposure remains manageable with named owners.
Three controls protect the value case.

Risk	Exposure	Mitigation	Owner
Adoption	Open	Role-based enablement	Business owner
Controls	Open	Human review and audit trail	Risk owner
Value leakage	Open	Monthly benefit validation	Finance owner

SO WHAT

Mitigate adoption and control risk before scaling.
